

Constructed Wetland

Property owners, Homeowners Associations, business owners, and residents responsible for maintenance of a constructed wetland must submit the following form annually by December 31 to the Engineering Department (one form per filter). Please fill out carefully and hit submit when completed. You may upload photos and files to this form. You cannot save this form and return to it. Please call us if you have questions.

Looking for a stormwater facility form for a facility type other than a constructed wetland?
GO TO OUR **STORMWATER BMP FORMS** MASTER PAGE TO SELECT FROM A LIST OF SYSTEM TYPES.

Stormwater Mgt. Measure Inspection Checklist

Inspection Checklist Instructions: Check off any conditions for the stormwater measure(s) you have. Any checkmarks require preventative and/or corrective maintenance. See forms on NJDEP website for suggested actions. This list represents general requirements.

Pretreatment (Forebay)

☐ Scouring or erosion present at inflow point

☐ Clogged pipes or excessive sediment in forebay

- ☐ Damaged outlet structure (e.g., cracking, subsidence, spalling, erosion, or deterioration)
- ☐ MTD inspection, if applicable (follow manufacturer instructions)

Bottom of System

Drain time in approx. hours _____

More than 72 hours may need corrective action.

- ☐ Excessive sediment, silt, or trash accumulation
- ☐ Erosion or channelization is present
- ☐ Animal burrows/rodents are present
- ☐ Uneven bed
- ☐ Evidence of sinkholes or subsidence
- ☐ Blockages, excessive sediment, silt, or trash accumulation on low flow channel
- ☐ Damaged low flow channel or undermined channel
- ☐ Basin liner visible and/or damaged (if applicable)

Vegetation

- ☐ Large spot(s) showing bare soil
- ☐ Overgrown Vegetation
- ☐ Tree growth in basin
- ☐ Invasive plants are present
- ☐ Algae blooming

Basin Embankment and Side Slopes

- ☐ Erosion, soil slide or bulges, seeps and wet spots, loss of vegetation, or erosion on the basin slope

Outlet

- ☐ Trash or debris accumulation more than 20%
- ☐ Trash rack is damaged or rusted greater than 50%; Trash rack is bent, loose, or missing parts
- ☐ Outlet components (e.g., orifice plates or weir plate) skewed, misaligned, or missing
- ☐ Discharge pipe apron is eroded or scoured
- ☐ Standing water is present in the outlet structure longer than 72 hours

Emergency Spillway

- ☐ Trees or excessive vegetation present
- ☐ Damaged structure

Miscellaneous

- ☐ Fence: broken or eroded parts
- ☐ Gate: missing gate or lock
- ☐ Sign/plate: tiled, missing, or faded
- ☐ Excessive or overgrown vegetation blocking access to the basin

Pond Area

- ☐ The water level in the pond is below the design water surface elevation

Observed Detention time in approx. hours _____

- ☐ Debris or trash floating on the water
- ☐ Excessive dead vegetation in the pond or wetland surface
- ☐ Mosquito Breeding
- ☐ Presence of domestic waterfowl and wildlife
- ☐ Erosion on pond side
- ☐ Subsidence of safety ledge

Marsh Area

- ☐ Marsh zone water depth is significantly above or below the design water depth; Dry spot(s) appearing in the marsh zone; Growth of trees or bushes in the marsh zone
- ☐ Vegetation loss in the high marsh zone
- ☐ Significant changes of the winding path pattern from the original design; Channelization in the wetland
- ☐ Islands or shallow marsh emerging out of the pond zone
